SUMMARY

Backend & DevOps Software Engineer focused on delivering scalable Java/Spring solutions and automating cloud infrastructure (AWS) using Docker, Terraform, and CI/CD. Complementary experience in Python and foundational understanding of React.

WORK EXPERIENCE

Vivo (Telefônica Brasil) – Curitiba, Brazil - *Software Quality Engineer Intern* (September 2024 – Present)

- Automated a 7-step manual data workflow using Python, transforming it into a single-click execution that significantly increased team efficiency.
 - Designed and maintained user-friendly web applications (HTML, CSS, JS, Python (Flask)) for complex Power BI dashboards, providing real-time data from a SQL Server database.
-

PROJECTS

Full Stack E-Commerce Platform (In development)

- Tech:** Java, Spring Boot, Spring Security, React, Next.js, TypeScript, PostgreSQL, Docker, AWS.
- Complete e-commerce platform with product management, secure user authentication, shopping cart, and payment integration.

KindAct & ImpactPro

- Tech:** HTML, CSS, JavaScript, PHP, MySQL.
- University websites developed to connect volunteers with NGOs and measure the social impact of projects.

Beach House Scheduler

- Tech:** Node.js, Express, PostgreSQL.
 - Simple booking system for a shared property featuring user login and a reservation calendar.
-
